

Section 1: Getting Started

Welcome to Nexus Analytics. This guide covers account setup, billing, data exports, and troubleshooting. To create your account, visit app.nexusanalytics.com and click Sign Up. Enter your business email and choose a password of at least 12 characters. You will receive a verification email within 5 minutes. Click the link in the email to activate your account. If you do not receive the email, check your spam folder or contact support@nexusanalytics.com.

Section 2: Billing and Payments

Nexus Analytics offers three plans: Starter at \$49/month, Professional at \$149/month, and Enterprise at custom pricing. Annual subscriptions receive a 20 percent discount. Invoices are generated on the first of each billing cycle and sent to your registered email. To update your payment method, navigate to Settings then Billing then Payment Method. We accept Visa, Mastercard, and PayPal. Refund requests must be submitted within 30 days of the charge by emailing billing@nexusanalytics.com with your invoice number.

Section 3: Data Exports

You can export data in CSV, Excel, and PDF formats. To export, open a report and click the Export button in the top toolbar. Select your format and click Download. Large exports over 10,000 rows are processed in the background and delivered by email when ready, typically within 10 minutes. Starter plan users may export up to 5 reports per month. Professional plan users have unlimited exports. Export limits reset on the first day of each billing cycle.

Section 4: Troubleshooting

If you cannot log in, first verify your email and password are correct. Use the Forgot Password link on the login page if needed. A password reset link will be sent within 5 minutes and expires after 30 minutes. If charts are not loading, clear your browser cache or try a different browser. For persistent issues, contact support@nexusanalytics.com with a description of the problem and your browser version. Our support team responds within 24 hours on business days.
